Total Test Case	13
Executed	4
Passed	4
Failed	0
Blocked	0
Not Excecuted	9
Pass Rate	100%
Fail Rate	0
Defects Found	0

4. Test Case Status

Test Case ID	Status
TC_BOOK_002	Pass
TC_SM_001	Pass
TC_SM_003	Pass
TC_BOOK_001	Pass

5. Defects Summary

Severity	Number of Defects
Critical	0
High	0
Medium	0
Low	0
Total	0

6. Key Testing Results

4 test cases were executed successfully and passed 4 cases.

- Room booking functionality was successfully verified, including verifying “book now” button works correctly and the users can select the booking date.
- Send message functionality was successfully verified, including verifying that the users can enter customer information and the system validates customer information when submitting the message.

7. Conclusion

Based on the executed test cases, all tested functionalities met their expected results. One defect was identified during this test execution. The tested functionalities are considered Pass and Fail based on the current test scope and execution results.

8. Recommendation

Users cannot select a booking date by clicking normally and must move the mouse across dates to select one. This issue should be fixed.
